These *Global Nutrition Report: Nutrition Accountability Framework Commitment Tracker* datasets contain the commitments registered with the Nutrition Accountability Framework (NAF).

The documents in this folder are as follows:

- **NAF_codebook.csv** contains information on each variable appearing in the data documents, including a description of the variable, the corresponding question from the registration forms and data type (numeric, binary or text)
- **Download_orgs_YYYYMMDD.csv** contains data on all stakeholder organisations
- **Download_commit_YYYYMMDD.csv** contains all commitment level information
- **Download_goal_YYYYMMDD.csv** contains all commitment goal level information

Each document contains corresponding ID variables to enable users of this dataset to link commitment goals with corresponding commitments and stakeholder organisations. These variables are described in the codebook.

The datasets are updated monthly. Each update includes all new and eligible commitments registered with the NAF since the previous update as well as any changes to commitments as they undergo the verification process. Data is provided in both the original and verified form. The date of the most recent update can be found at the top of this document and in the file names in the format YYYYMMDD.

If you require an older version of this dataset, please email naf@globalnutritionreport.org, specifying the dataset which you require.

Where commitments have been submitted in a language other than English, the relevant variables have been translated into English. The original submission in the non-English language is also available as part of these documents.

The GNR host organisation is responsible for the management and maintenance of the NAF dataset and any query related to the data should be directed to naf@globalnutritionreport.org
